

## Fall 2021 Club Descriptions

### Athenian Sports

Athenian Sports is our after-school athletics program that focuses on developing strength and skill sets to make our students good athletes and equipped to perform well in multiple athletic settings. In addition to learning skills related to volleyball, football, basketball and soccer, athletes will learn the importance of teamwork, responsible play, and sportsmanship towards fellow players. The program is run by Mr. Conklin as Athletic Director, and coached by Trivium East teachers Ms. Bennett, Mr. Ortiz, and Ms. Rodriguez, and Ms. Thompson.

Registration runs per semester and there are two-semester sessions. Our first-semester session will end in December and athletes will learn volleyball first and football to follow. In our second semester session, they will begin with soccer and end with basketball. Remember, when you sign up then your scholar is signed up for BOTH sports.

### Chess Emporium Chess Club

Chess Emporium teaches a fun and exciting introduction to the game of chess. Club begins by teaching students how to play the game, chess openings, tactics, and endgames. Students will practice what they learn each week in games with their friends. Studies by major corporations have shown that chess can help students improve their math and verbal skills, creative abilities, and critical thinking abilities. Chess provides helpful insights into mathematics, visualization, analysis, and writing skills.

### The Corinthian Company

The Corinthian Company is a club in which students will learn the basics of performing for the stage, such as diction, projection, improvisation, character formation, movement, memorization, and the various processes by which a performance for the theatre is made possible. Lessons include but are not limited to: the significance of leading by example, the theatre as a public service, the value of teamwork to produce a cohesive work, responding to

stage fright, and understanding personal growth. The course will culminate in a short, end of the year performance, implementing the learned techniques in front of a live audience.

### Cooking Club

Cooking club is an invigorating experience for children, experiencing the basics to next level cooking instruction. This is done in the science lab w/ hot plates, oven, toaster and blender. Join and see what delicious dishes your scholar can make!

### Yearbook

Yearbook is a chance for your scholar to apply their creativity into our yearly yearbook. From helping design, taking pictures, editing and organizing. They will be making important decisions with our yearbook teachers to create a memory to remember. Sign up and be part of something memorable!

### Young Rembrandts

Research says what Young Rembrandts has always delivered. There is a correlation between involvement in the arts and academic success. Children who learn to draw using the Young Rembrandts method develop spatial reasoning and fine motor skills, order and sequencing abilities, visualization, and self-discipline as well as fundamental art skills. Our weekly classes introduce concrete ideas and techniques that enlarge children's vocabulary, enrich their imaginations, and build their minds.
